HYDERABAD

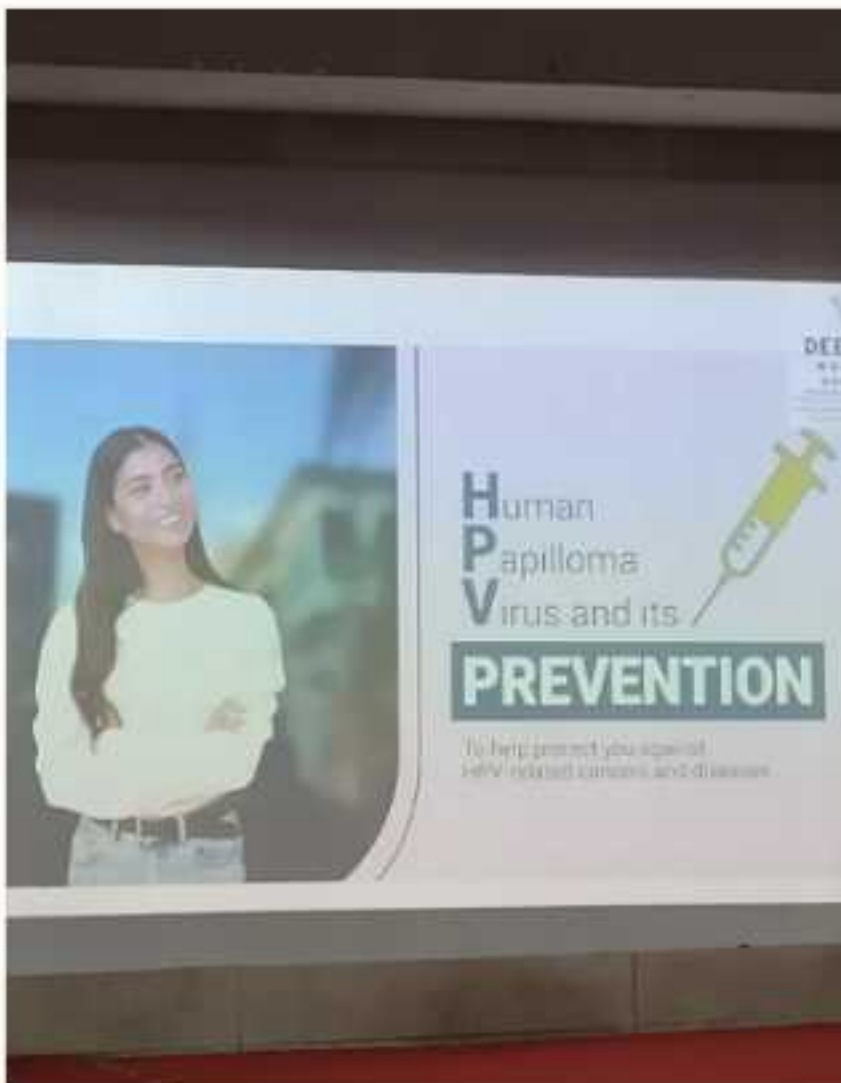

BUZZ OF THE MONTH

VSAP × NSS × WORLD CANCER DAY

Dr. Tapaswini. (Faculty co ordinator)

On February 4th, marking World Cancer Day, Vaishnavi School of Architecture and Planning (VSAP) organized a Cervical Cancer Awareness Program in collaboration with VSAP NSS Team. The event was coordinated by NSS Faculty Coordinators Associate Prof. Archana and Associate Prof. Tapaswini, along with NSS Student Coordinator Madhumita, 8th-semester student. The session, held from 3 PM to 4 PM in the VSAP Auditorium, featured an informative talk by Dr. Monisha Deepika an expert in obstetrics, gynecology, infertility, reproductive medicine, and laparoscopic surgery from Deepika Women’s Hospital , Madhapur. She highlighted the alarming statistics of cervical cancer, its link to HPV, and the importance of early detection and vaccination. The initiative aimed to educate students on preventive measures, reinforcing the message that “Her Fight is Our Fight.”

Expert Session on Waterproofing by DR. Fixit

VSAP organized an expert session on “Damage, Decay, Repair & Waterproofing” for 5th Semester students, conducted by Dr. Fixit’s team and coordinated by Professor N. Ramaswamy. The session covered structural damage, material decay, repair techniques, and advanced waterproofing solutions. Through live demonstrations and an interactive Q&A, students gained valuable insights into moisture control, structural restoration, and sustainable building practices. Such industry interactions bridge the gap between academics and real-world applications, equipping students with practical knowledge for resilient architectural design.

Dr. Tapaswini. (Faculty co ordinator)

EMERGING CONSTRUCTION TECHNOLOGIES

Dr. Onkar K. Chothe, Assistant Professor at NICMAR, Hyderabad, delivered an insightful session for 10th-semester thesis students, focusing on the latest advancements in the construction industry. Addressing key challenges, he emphasized the transformative role of Building Information Modeling (BIM) in modern design and execution. He highlighted innovations in robotics and autonomous construction equipment, including drone fleets, automated bricklaying, and IoT-based asset management. The session covered the integration of AR & VR in construction, the significance of Work Breakdown Systems (WBS), and the necessity of precision-driven software like Revit, Navisworks, MSP, and Primavera. His expert insights provided students with valuable industry exposure, bridging theoretical knowledge with real-world applications crucial for their thesis research and professional growth.

Dr. Tapaswini. (Faculty co ordinator)

Submissions, Jury & stress

The month of February has been a rollercoaster of deadlines, submissions and juries. It is that time of the year, with sheets piled up, models unfinished, last minute changes and inevitable stress. The constant struggle to balance creativity with time has pushed us to limits. Broken sleep cycles, skipped meals, and the pressure to meet the deadlines has become a loop. As the month comes to an end, we are exhausted, but we also feel the quiet sense of achievement. The loop may begin again, but so does our resilience.

A Visit to T- WORKS

Rahithya . (3rd Sem)

The first-year students of Vaishnavi Architecture School recently visited T-WORKS, India's largest hardware prototyping center, for an experiential learning session focused on hardware prototyping techniques applicable to architectural design. During the session, students explored various fabrication tools and technologies, learning the integration of design and prototyping. Ar. Rithin from IKI Studios enlightened the students with a masterclass which provided valuable inputs into sustainable building technologies. The visit was a valuable experience, providing the students with a hands-on experience and insights, preparing the students for the real world challenges in architecture.

Get Customised EMBROIDERY & CROCHET

Embroidery from online platform Instagram handle: @themade_05 created by Pavana 8th sem student & Embroidery & crochet from @thread.and.twine where customised art works are done for sale. They customise the art work into tote bags & gifts items like key chains , ear rings etc . Do visit the accounts.

Insight from AD-VI :

Students Corner

The Journey for Balance,
Is nothing less than penance.
The road is long and winding,
Diverging paths are blinding.

It frustrates me totally
As it explodes into reality
Turning thoughts into confusion,
My dreams are an illusion.

But I have also grown
From a delicate flower
To a curious learner
From a chaotic cacophony
To the rhythmic harmony.

From a careless breeze that
blew away
To a dominant tornado that
made its way.
From an aggressive speech
To an ambitious movement.

I sometimes miss my careless
days,
Those joyful months, those
exciting ways.
Those soothing tunes, those
wonderful moments.
But I see the sparkle in the sky,
The future is waiting for me to
fly.
